COURSE OVERVIEW

“ **Take your skills to the next level with our 4-day Full-Arch Live Surgery Residency.** ”

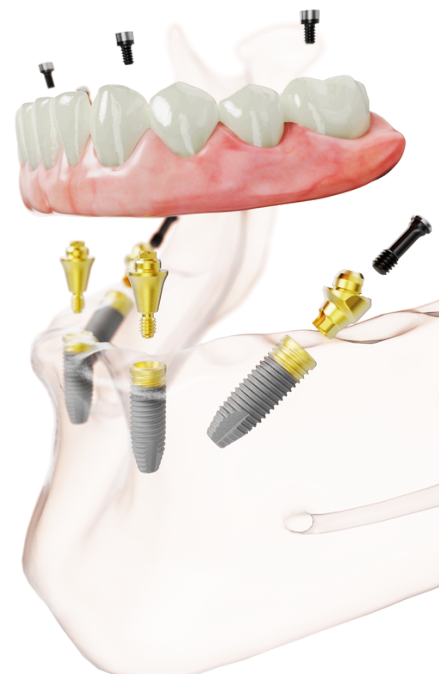

Under the expert guidance of Dr. David Norcross and his associates, you'll apply the techniques you learn by performing full-arch surgeries on live patients.

This course is designed for practitioners with experience in dental implant placement, who want to refine and enhance their skills in full-arch immediate loading using a fully digital workflow.

You will receive close, personalised guidance, with cases tailored to your own experience level and learning objectives. In addition to gaining invaluable hands-on surgical experience, you'll also have the opportunity to provide life-changing, free of charge dental rehabilitation to patients in need.

Each patient will be restored using a fully digital workflow and loaded with a 3D printed provisional before the end of the course.

Our aim is to deliver world-class live surgery training in a state-of-the-art facility, with fully ethical planning and long-term patient care. Elevate your surgical skills in this intensive, interactive 4-day course in the accessible, luxurious setting of Dubai, United Arab Emirates.

COURSE INFO

Sofitel Dubai, The Obelisk

5-star hotel with pool, gym, sauna, steam room and spa. Just a short walk from the clinic. Gourmet breakfast included.

- Palatal approach implants
- Pterygoid implants
- Soft tissue management
- Prevention & management of complications
- iMetric | iCam scanning
- Intra-oral scanning
- 3D printing & processing a full arch provisional restoration
- Immediate loading

DR. DAVID NORCROSS

“ *My experience with the All-On-4® treatment concept began over 10 years ago. Since then, full arch implant treatment has become an obsession.* ”

The Full-Archiving programme was born out of an obsession to learn everything I could about the All-On-4® treatment concept and full arch implant methods. That obsession has taken me around the globe to learn from global experts. We have developed our own treatment protocols, based on those methods that have helped us treat hundreds of patients successfully.

During this course, our aim is to share all of our treatment protocols, from standard All-On-4® techniques to complex management of severely atrophic cases. Whether you are looking to start out your full-arching journey, or you are an experienced surgeon looking to refine your surgical skills, we hope that you will gain a lot of knowledge from our course.

Dr David Norcross
